CONTROL AND  
SHUT-OFF VALVES

**200 line**  
acc. to ANSI/ASME

# 200 line

**CV / SV 220 (Ex)**  
**CV / SV 230 (Ex)**

control or shut-off valve

**CV 222 (Ex)**  
**CV 232 (Ex)**

control valve with  
pressure-balanced plug

Control valves **CV (SV) 200 (Ex)** are designed for regulation and shut-off of process liquid flow. In Ex proof version meet the requirements II 1/2G IIC T6...T1 Ga/Gb acc. to ČSN EN ISO 80079-36 (9/2016) and ČSN EN 1127-1 section 2 (1/2012). The selected materials correspond to recommendations stipulated by ČSN EN 12516-1 (8/2015) - steel and ČSN EN 1503-3 (1/2002) - cast. The maximal permissible operating pressures in behaviour with types of material and temperature are specified in the table on page 67 of this catalogue.

## Control

hand wheel or electromechanical actuators of producers  
**Regada, Schiebel, Auma, Rotork**  
pneumatic actuators of producers **Flowserve, A. Hock.**

## Application

**CV / SV 2xx** - heating, ventilation, power generation and chemical processing industries  
**CV / SV 2xx Ex** - gas and chemical industries

## Process media

**CV / SV 2xx** - liquids, gases and vapours without abrasive particles  
e.g. water, steam, air and other media compatible with material of the valve inner parts  
**CV / SV 2xx Ex** - technical and fuel gases and inflammable liquids

To ensure a reliable regulation, the producers recommends to pipe a strainer in front of the valve into pipeline or ensure in any other way that process medium does not contain abrasive particles or impurities

## Installation

The valve can be installed in any position except position when the actuator is under the valve body. The valve is to be piped the way so that the direction of medium flow will coincide with the arrows on the body

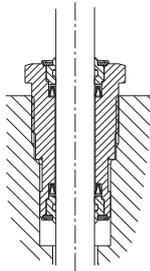

It is necessary to protect the actuator from excessive heat from the pipeline at medium temperatures above **150°C (300°F)**, e.g. by appropriately insulating the pipeline and valve and tilting the actuator from the vertical axis. Detailed informations are given in the instruction for installation and service

## Packings

### DRSpack® (PTFE)

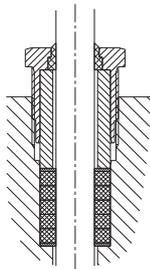

DRSpack® (Direct Radial Sealing Pack) is a packing with high tightness at both low and high operating pressure values.

It is the most used type of packing suitable for temperatures ranging from 0 °C to 260 °C. The pH range is from 0 to 14. The packing enables using of actuators with low linear force. The design enables an easy change of the whole packing. The average service life of DRSpack® is more than 500 000 cycles.

### Graphite

This type of packing can be used for media with temperature up to **550°C (1020°F)** and pH range: 0 to 14. Packing can be "sealed up" either by screwing the packing screw in or adding another sealing ring. In regard of intensive frictional forces, graphite packing is suitable for actuators with a sufficient linear force.

## Principles for plug type selection

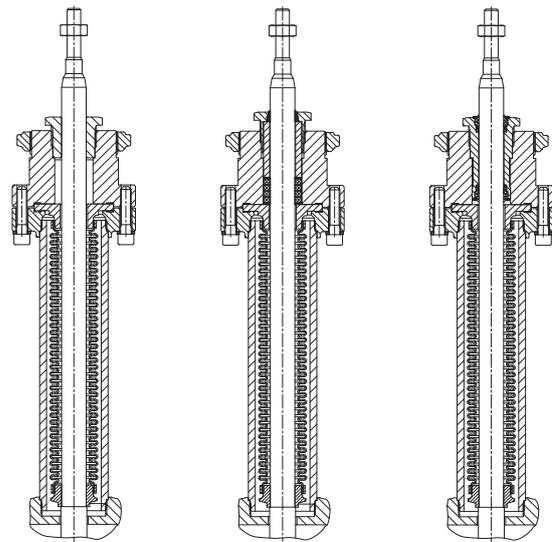

V-ported plugs should not be used in supercritical differential pressures with inlet pressure  $p \geq 0,4$  MPa and for regulation of saturated steam. In these cases we recommend to use a perforated plug. The perforated plug should be also used always when cavitation may occur due to a high differential pressure value or valve ports erosion caused by high speed of process medium flow. If the parabolic plug is used (because of small Kvs) for supercritical differential pressures, it is necessary to close both plug and seat with a hard metal overlay, i.e. stellite trim.

## Bellows

Bellows packing is suitable for low and high temperatures ranging from **-50 to 550°C (-58 to 1020°F)**. Bellows ensures absolute tightness to environment. Packing is equipped with safety PTFE packing as standard to prevent medium from leaking in case of damage to bellows. Intensive linear forces are not required.

**Bellows packing is suitable for applications with very aggressive, toxic or other dangerous media that require absolute tightness to environment.** In such case, it is necessary to check compatibility of used body material as well as the valve inner parts material with process medium. It is recommended to use bellows with safety packing preventing medium from leaking in case of damage to bellows when there is an extremely dangerous process medium used.

Bellows is also a great solution to use of process medium either with temperature below zero when ice accretions cause premature damage to packing or with high temperatures when bellows ensures medium cooling.

Bellows  
without safety packing

Bellows with  
safety graphite  
packing

Bellows with  
safety PTFE  
packing

## Rangeability

Rangeability is the ratio of the biggest value of flow coefficient to the smallest value. In fact it is the ratio (under the same conditions) of highest regulated flow rate value to its lowest value. The lowest or minimal regulated flow rate is always higher than 0.

# CV / SV 2x0

Control  
and shut-off valves

**NPS ½"- 10"**  
**Class 150**

Technical data		
Series	CV / SV 220 (Ex)	CV / SV 230 (Ex)
Type of valve	Two-way, single-seated, control (shut-off) valve	
Nominal pressure	NPS 1/2" to 10" Class 150	
Body material	Cast steel A216 WCB, A217 WC6	Stainless steel A351 CF8M
Seat material: NPS ½"-2"	1.4028	1.4571
NPS 2½"-10"	1.4027	1.4581
Plug material: NPS ½"-2½"	1.4021	1.4571
NPS 3"-10"	1.4027	1.4581
Stem material	1.4923	1.4980
Operating temperature range	-50 to 550 °C (-58 to 1020 °F)- (request for negative temperature need to be specified in order)	
Face to face dimensions	acc. to ISA-75.08.01-2002 /R2007) for version with flanges	
Connection flanges	Acc. to ASME B16.5-2013	
Flange faces	RF (Raised Face), LFF (Large Female Face), SFF (Small Female Face), LGF (Large Groove Face), SGF (Small Groove Face)	
Type of plug	V-ported, contoured, perforated	
Flow characteristic	Linear, equal-percentage, LDMspline®, parabolic, on - off	
Kvs value	0,01 to 800 m³/h (0,012 to 950 US gallon/min)	
Leakage rate	Class III. acc. to ANSI/FCI 70-2-2013 (<0,1% Cv) for c. valves with metal-metal seat sealing Class IV. acc. to ANSI/FCI 70-2-2013 (<0.01% Cv) for c. valves with metal-PTFE seat sealing Class IV. acc. to ANSI/FCI 70-2-2013 (<0.01% Cv) for shut-off valve	
Leakage rate for Ex version	CV 2xx Class IV. acc. to ANSI/FCI 70-2-2013 (<0.01% Cv); SV 2xx Rate C acc. to ISO 5208:2008	
Rangeability r	50 : 1	
Packing	DRSpack* (PTFE) t <sub>max</sub> = 260°C (500°F), exp. graphite t <sub>max</sub> = 550°C (1020°F), bellows (NPS ½"- 6") t <sub>max</sub> = 550°C (1020°F)	

## Kvs values and differential pressures $\Delta p_{\max}$ [Mpa], [psi] of valves NPS 1/2" - 10" with V-ported plugs, contoured plugs (flow direction below plug) for electromechanical actuators

$\Delta p_{\max}$  value is the valve max. differential pressure when open - close function is always guaranteed. In regard of service life of seat and plug, it is recommended so that permanent differential pressure would not exceed 1.6 MPa, 232 psi. Otherwise it is suitable to use perforated plug, or sealing surfaces of seat and plug with a hard metal overlay.

Max. differential pressures specified in table apply to PTFE and graphite packing.  
 Δp for bellows must be consulted with the producer.

## Kvs values and differential pressures $\Delta p_{max}$ [Mpa], [psi] of valves NPS 1/2" - 10" V-ported plugs, contoured plugs (flow direction below plug) for pneumatic actuators

$\Delta p_{max}$  value is the valve max. differential pressure when open - close function is always guaranteed. In regard of service life of seat and plug, it is recommended so that permanent differential pressure would not exceed 1.6 MPa, 232 psi. Otherwise it is suitable to use perforated plug, or sealing surfaces of seat and plug with a hard metal overlay.

Max. differential pressures specified in table apply to PTFE and graphite packing.  
Δp for bellows must be consulted with the producer.

## Kvs values and differential pressures $\Delta p_{max}$ [MPa], [psi] of valves NPS 1/2" - 10" with perforated plugs (flow direction above plug) for electromechanic actuators

$\Delta p_{max}$  value is the valve max. differential pressure when open - close function is always guaranteed.

Max. differential pressures specified in table apply to PTFE and graphite packing.  
 $\Delta p$  for bellows must be consulted with the producer.

## Kvs values and differential pressures $\Delta p_{max}$ [MPa], [psi] of valves NPS 1" - 8" with perforated plugs (flow direction above plug) for pneumatic actuators

$\Delta p_{max}$  value is the valve max. differential pressure when open - close function is always guaranteed.

For further information on actuating, see actuators' catalogue sheets			Pneumatic actuator		Flowserve PA 253				Flowserve PB 503		A. Hock 2109

## CV 2x2

Control valve with  
pressure-balanced  
plug

**NPS 1"- 10"**  
**Class 150**

### Technical data

Series	CV 222 (Ex)	CV 232 (Ex)
Type of valve	Two-way, single-seated, control valve with pressure balanced plug	
Nominal size range	NPS 1" to 10"	
Nominal pressure	Class 150	
Body material	Cast steel A216 WCB, A217 WC6	Stainless steel A351 CF8M
Seat material: NPS ½"-2"	1.4028	1.4571
NPS 2½"-10"	1.4027	1.4581
Plug material: NPS 3"-10"	1.4021	1.4571
	1.4027	1.4581
Stem material	1.4923	1.4980
Operating temperature range	-50 to 550 °C (-58 to 1020 °F)- (request for negative temperature need to be specified in order)	
Face to face dimensios	Acc. to ISA-75.08.01-2002 /R2007) for version with flanges	
Connection flanges	Acc. to ASME B16.5-2013	
Flange faces	RF (Raised Face), LFF (Large Female Face), SFF (Small Female Face), LGF (Large Groove Face), SGF (Small Groove Face)	
Type of plug	V-ported, contoured, perforated	
Flow characteristic	Linear, equal-percentage, LDMspline®, parabolic, on - off	
Kvs value	1,6 to 800 m <sup>3</sup> /h (1,85 to 950 US gallon/min)	
Leakage rate	Class III. acc. to ANSI/FCI 70-2-2013 (<0,1% Cv) for c. valves with metal-metal seat sealing Class IV. acc. to ANSI/FCI 70-2-2013 (<0.01% Cv) for c. valves with metal-PTFE seat sealing	
Leakage rate for Ex version	Class IV. dle ANSI/FCI 70-2-2013 (<0.01% Cv)	
Rangeability r	50 : 1	
Packing	DRSpack® (PTFE) t <sub>max</sub> = 260°C (500°F), exp. graphite t <sub>max</sub> = 550°C (1020°F), bellows (NPS ½"- 6") t <sub>max</sub> = 550°C (1020°F)	

## Kvs values and differential pressures $\Delta p_{max}$ [MPa], [psi] of valves with pressure balanced plugs NPS 1" - 10" with electromechanic actuators

$\Delta p_{max}$  value is the valve max. differential pressure when open - close function is always guaranteed. In regard of service life of seat and plug, it is recommended so that permanent differential pressure would not exceed 1.6 MPa, 232 psi. Otherwise it is suitable to use perforated plug, ( $\Delta p$  up to 2,0 MPa, 290 psi) or sealing surfaces of seat and plug with a hard metal overlay ( $\Delta p$  up to 2,0 MPa, 290 psi).

5) linear characteristic only

Perforated plug available only with Kvs values in shadowed frames with the following restrictions:  
 - Perforated plug with Kvs value acc. to column No. 2 available with linear or parabolic characteristic only  
 Max. differential pressures specified in table apply to PTFE and graphite packing.  
 Δp<sub>max</sub> for bellows must be consulted with the producer.

45				0,40	0,75	0,75	0,75

## Accessories

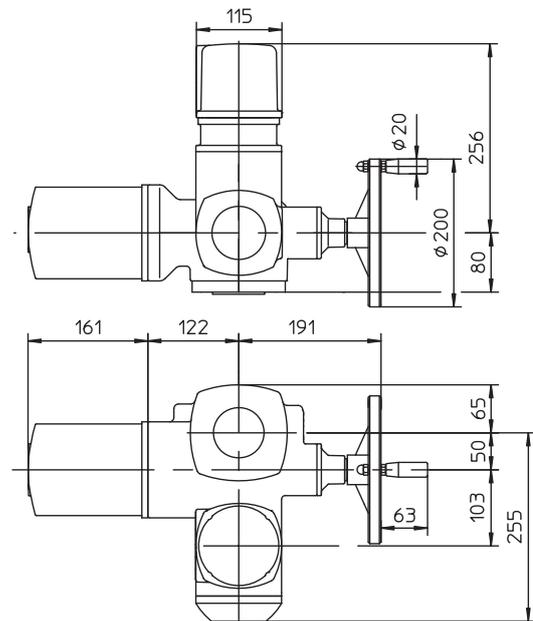

- 2 TANDEM switches
  - Gearing for signalisation of position
  - Mechanical position indicator
  - Potentiometer 1x200 Ω
  - MATIC - or continuous control (specification of accessories acc. to catalogue of producer: IP 67; -25 to +70°C; ...), weight + 7 kg
  - AUMATIC - or continuous control (specification of accessories acc. to catalogue of producer: IP 68; -25 to +70°C; ...), weight + 7kg
  - Other accessories acc. to catalogue of producer of actuators.
- Electronic position transmitter RWG (potentiometer included), 4 - 20 mA, 2-wire
  - Electronic position transmitter RWG (potentiometer included), 4 - 20 mA, 3/4-wire
  - Inductive position transmitter IWG, 4 - 20 mA

Columns	130	150 / —	M20x1.5 M16x1.5	P-1045b/B; P-1045b/E P-1045b/C; P-1045b/H																
Additional equipment																				
	Without additional equipment; adjusted max. switching-off thrust from range																			
A	2 additional position switches S5,S6																			

Possible combinations and execution: A+B = 07

### Notes:

- State the switching-off thrust in your order by words. If not stated it is adjusted to the maximum rate of the corresponding range. The load torque equals minimally the maximum switching-off thrust of the choosing range multiplied by 1.3.
- The maximum load thrust equals the max. Switching-off thrust multiplied by:
  - 0.8 for duty cycle S2-10 min., or S4-25%, 6 - 90 cycles per hour
  - 0.6 for duty cycle S4-25%, 90 - 1200 cycles per hour
- The thread in the coupling is to be specified in the order by words.

## Electric actuators **Regada**

**ST 0**  
**STR 0**

marking in type number:

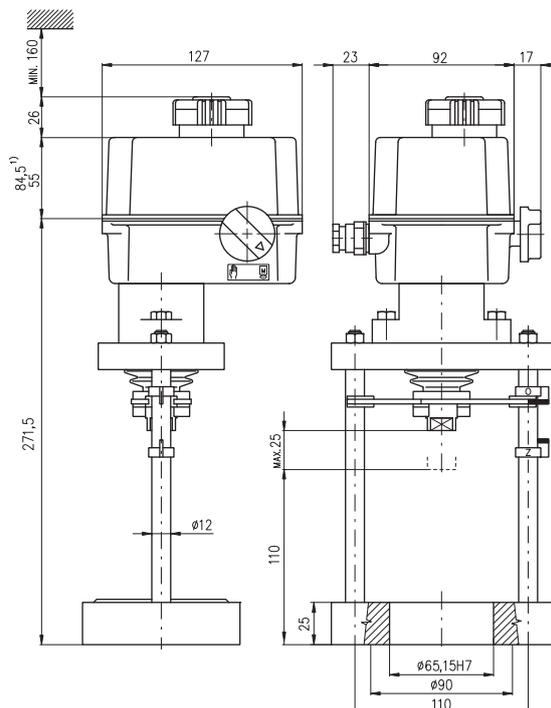

**EPK**

### Technical data

Type	<b>ST 0, STR 0</b>
Marking in valve spec. No.	<b>EPK</b>
Voltage	230 V AC, 24 V AC
Frequency	50 Hz
Power consumption	1 W
Control	3-position (0 - 10 V, (0)4 - 20 mA)
Nominal force	2,9 kN a 4,5 kN
Travel	16, 25 mm
Enclosure	IP 54/ IP 67
Process medium max. temp.	daná použitou armaturou
Ambient temperature range	-25 to 55 °C
Ambient humidity range	5 - 100% s kondenzací
Weight	2,5 to 4,5 kg

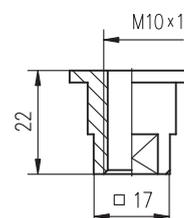

→ **Note:** Specifications and technical data are for information only. Detailed technical informations can be found in producer's data sheet or on the website [www.regada.sk](http://www.regada.sk)

### Dimensions of actuator

<sup>1)</sup> applies for version with electronic transmitter

#### Detail of coupling

## Specification of actuator ST 0, STR 0

Electric servomotor ST 0, STR 0				490.	X	-	X	X	X	X	X	X	/	X	X							
<b>Climatic resistance</b>	Standard	-25°C to +55°C	IP 54	Without regulator ( <b>ST 0</b> )	0

Notes:

<sup>(6)</sup> applies for version without regulator

<sup>(8)</sup> it is not possible to choose double transmitter for version with 2 auxiliary position switches

## Electric actuators **Regada**

**STR 0.1PA**

marking in type number:

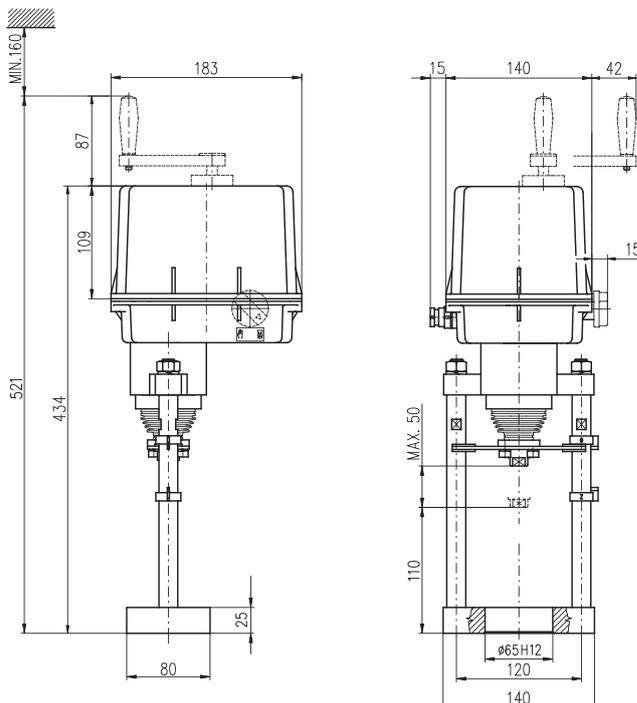

**EPL**

### Technical data

Type	<b>STR 0.1PA</b>
Marking in valve spec. No.	<b>EPL</b>
Voltage	230 V AC, 24 V AC
Frequency	50 Hz
Power consumption	15 W
Control	3-position (0 - 10 V, (0)4 - 20 mA)
Nominal force	4,6 and 7,2 kN
Travel	16, 25, 40 mm
Enclosure	IP 67
Process medium max. temp.	acc. to used valve
Ambient temperature range	-25 to 55 °C
Ambient humidity range	5 - 100% with condensation
Weight	5,4 to 8 kg

→ **Note:** Specifications and technical data are for information only. Detailed technical informations can be found in producer's data sheet or on the website [www.regada.sk](http://www.regada.sk)

## Accessories

<b>Elektropneumatic positioner type SRI 981</b>	Device with electric input of 20 - 100 kPa to control the pneumatic actuators with pneumatic control signal
<b>Elektropneumatic positioner type SRI 986</b>	Analog positioner with input signal 4(0) - 20 mA
<b>Elektropneumatic positioner (analog) type SRD 990</b>	Device with electric input of 4 (0) - 20 mA and outlet of controlling air into actuator. It is adjusted by PC and special software
<b>Elektropneumatic positioner (intelligent) type SRD 991</b>	Device with electric input of 4 (0) - 20 mA and outlet of controlling air into actuator. It is adjusted by PC and special software
<b>Elektropneumatic positioner (intelligent) type SRD 998</b>	Device with electric input of 4 (0) - 20 mA and outlet of controlling air into actuator. Standard equipment: HART, LED display, setting using the multi selector
<b>Elektropneumatic positioner SIPART PS2</b>	Digital positioner se vstupem 4(0) - 20 mA
<b>Elektropneumatic positioner ABB TZIDC</b>	Digital positioner se vstupem 4(0) - 20 mA
<b>Signalisation switches type SGE985</b>	Adjustable end position switches
<b>Air set type G651 (-20 to 50°C)</b>	Reduces the supply pressure to a value required
<b>Air set type typ FRS 923 (-40 to 80°C)</b>	Reduces the supply pressure to a value required
<b>Solenoid valve standard type SC G551A005</b>	Direct operated electromagnetic valve, version 3/2, function U (universal), G 1/4"
<b>Solenoid valve standard type SC G327B001</b>	Direct operated electromagnetic valve, version 3/2, function U (universal), G 1/4", with the increased safety/epoxy encapsulation operator
<b>Solenoid valve inexplosive EEx em type EM G327B001</b>	Direct operated electromagnetic valve, version 3/2, function U (universal), G 1/4", with the increased safety/epoxy encapsulation operator
<b>Solenoid valve inexplosive EEx d type NF G327B001</b>	Direct operated electromagnetic valve, version 3/2, function U (universal), G 1/4", solid conclusion
<b>Solenoid valve 5/2-way type SCG551B417</b>	Direct operated electromagnetic valve, version 5/2, function U (universal), G 1/4", (use for double-acting actuators)
<b>Air lock relay, type EIL 200</b>	Retaining device for closing of air pipeline on a pressure drop
<b>Booster-valve type EIL 100</b>	Airflow enhancer

### Operating conditions

Pneumatic actuators Flowserve can operate with extremely high ambient temperatures with unique resistance to shock loads. They excel with resistance to vibrations and reached 10<sup>7</sup> of cycles in operation. It is possible to deliver the actuator with both fail to open and fail to close function, possibly with a position blocking (air lock) upon feeding pressure air supply failure. Various accessories can be delivered together with the actuator.

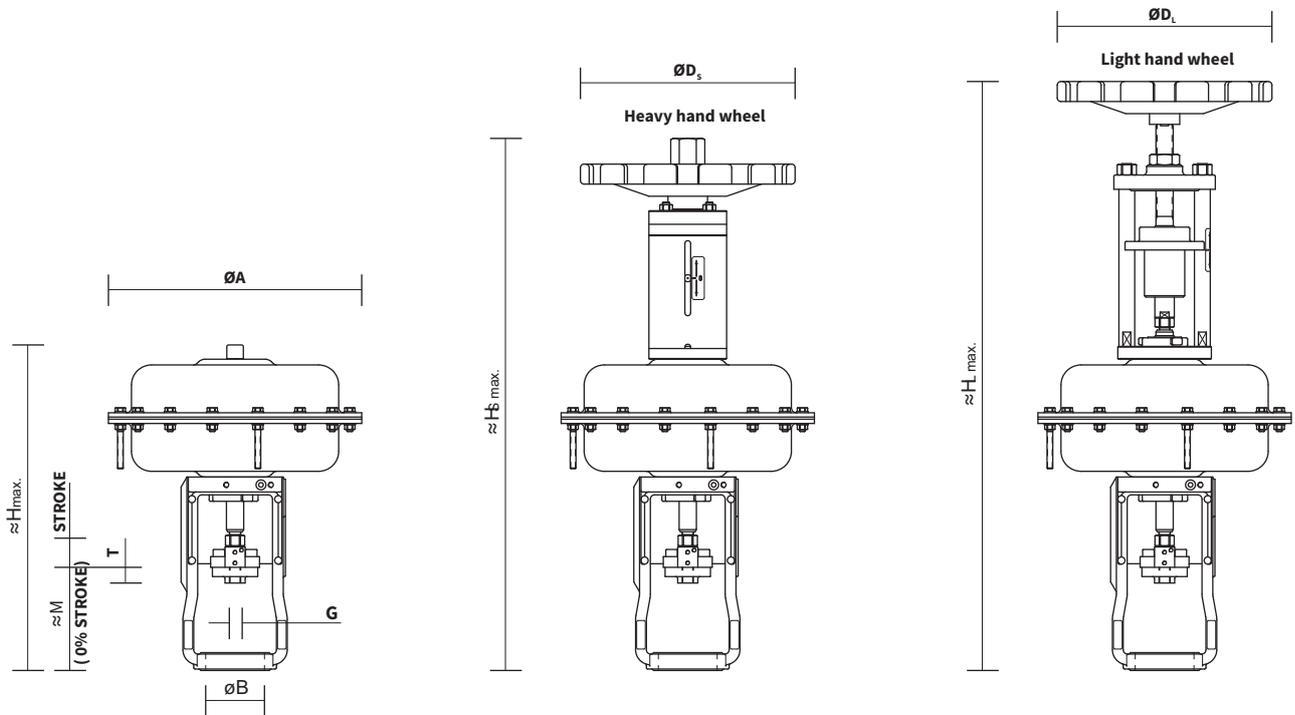

### Direct and indirect functions

Direct function ensures that actuator's stem retracts upon control air supply failure (valve opens).

Indirect function ensures that actuator's stem extends upon control air supply failure (valve closes).

## Dimensions and weight of actuators Flowserve series 253 - 701

# Flowserve

### PO 1502

marking in type number:

**PFD**

### Technical data

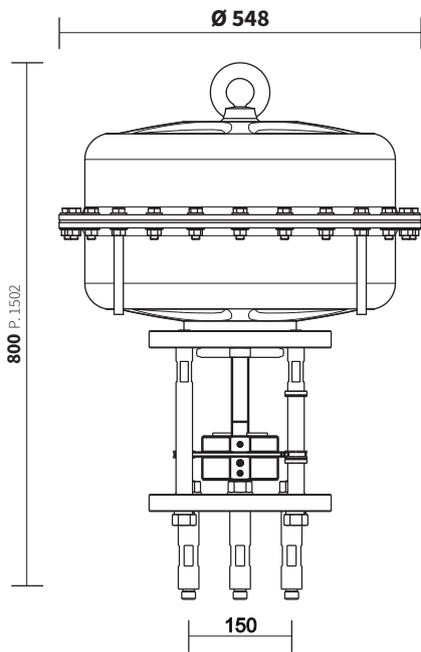

Type	<b>PO 1502</b>		
Marking in valve spec. No.	<b>PFD</b>		
Feeding pressure	6,0 bar max		
Function	direct	indirect	
Control	pneumatic signal 0,2 - 1,0 bar current signal 0(4) - 20 mA		
Nominal force	according to table of nominal force values		
Travel	80, 100 mm		
Enclosure	IP 54		
Process medium max. temp.	acc. to used valves		
Ambient temperature range	-40 to 80 °C		
Ambient humidity range	95 %		
Weight	124 kg - with hand wheel 174 kg

### Accessories

<b>Elektropneumatic positioner type SRI 981</b>	Device with electric input of 20 - 100 kPa to control the pneumatic actuators with pneumatic control signal
<b>Elektropneumatic positioner type SRI 986</b>	Analog positioner with input signal 4(0) - 20 mA
<b>Elektropneumatic positioner (analog) type SRD 990</b>	Device with electric input of 4 (0) - 20 mA and outlet of controlling air into actuator. It is adjusted by PC and special software
<b>Elektropneumatic positioner (intelligent) type SRD 991</b>	Device with electric input of 4 (0) - 20 mA and outlet of controlling air into actuator. It is adjusted by PC and special software
<b>Elektropneumatic positioner (intelligent) type SRD 998</b>	Device with electric input of 4 (0) - 20 mA and outlet of controlling air into actuator. Standard equipment: HART, LED display, setting using the multi selector
<b>Elektropneumatic positioner SIPART PS2</b>	Digital positioner se vstupem 4(0) - 20 mA
<b>Elektropneumatic positioner ABB TZIDC</b>	Digital positioner se vstupem 4(0) - 20 mA
<b>Signalisation switches typ SGE985</b>	Adjustable end position switches
<b>Air set type G651 (-20 to 50°C)</b>	Reduces the supply pressure to a value required
<b>Air set type typ FRS 923 (-40 to 80°C)</b>	Reduces the supply pressure to a value required
<b>Solenoid valve standard type SC G551A005</b>	Direct operated electromagnetic valve, version 3/2, function U (universal), G 1/4"
<b>Solenoid valve standard type SC G327B001</b>	Direct operated electromagnetic valve, version 3/2, function U (universal) G 1/4", with the increased safety/epoxy encapsulation operator
<b>Solenoid valve inexplosive EEx em type EM G327B001</b>	Direct operated electromagnetic valve, version 3/2, function U (universal), G 1/4", solid conclusion
<b>Solenoid valve inexplosive EEx d type NF G327B001</b>	Direct operated electromagnetic valve, version 3/2, function U (universal), G 1/4", solid conclusion
<b>Solenoid valve 5/2-way type SCG551B417</b>	Direct operated electromagnetic valve, version 5/2, function U (universal), G 1/4", (use for double-acting actuators)
<b>Air lock relay, type EIL 200</b>	Retaining device for closing of air pipeline on a pressure drop
<b>Booster-valve type EIL 100</b>	Airflow enhancer

## Pneumatic actuators

# A. Hock

**2109, 2112, 2112S**  
**2112T, 2116, 2116S**

marking in type number:

**PHF, PHA, PHB, PHC**

A. Hock pneumatic actuators are suitable for applications in extreme conditions and have good shock resistance. Actuators can be supplied in direct, reverse and springless configuration. Broad range of accessories is available.

Technical data						
Type	2109	2112	2112S	2112T	2116	2116S
Marking in valve spec. No.	PHF	PHA		PHB	PHC	
Max. supply pressure	NO, NC	6 bar		acc. to springs	6 bar	
Function	double-acting	5,5 bar		3 bar	5,5 bar	
Control	direct (NO), reverse (NC), double-acting					
Nominal force	pneumatic signal 20-100 kPa electric signal 4-20 mA					
Stroke	according to springs					
Enclosure	16, 20	16, 20, 25, 40		25, 40	40, 80, 100	
Process medium max. temp.	according to used valve					
Ambient temperature range	standard -40 to 100 °C alternatively -60 to 80 °C					
Weight	see dimensions table					

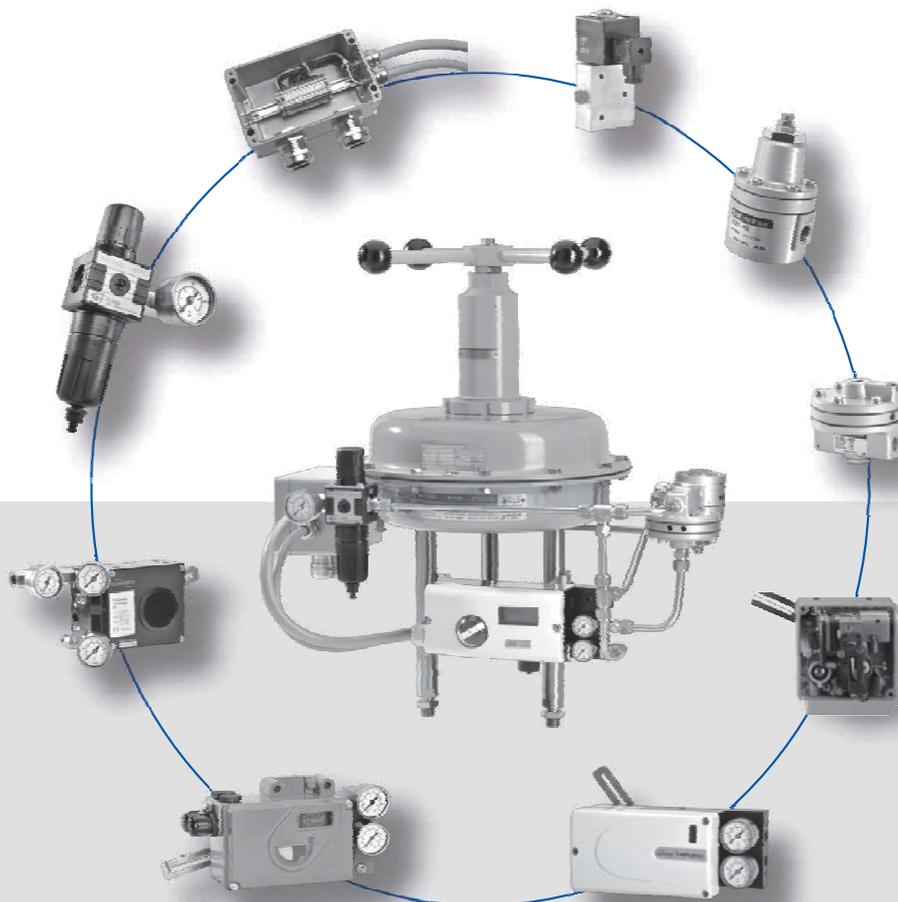

### Direct and reverse functions

**Direct function** ensures that actuator's stem retracts upon control air supply failure (valve opens).

**Reverse function** ensures that actuator's stem extends upon control air supply failure (valve closes).

## Accessories

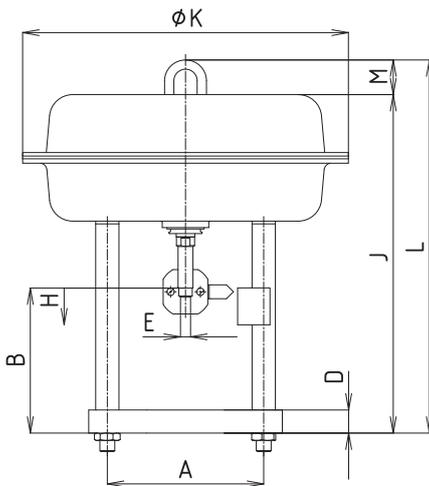

<b>Pneumatic positioner type SRI 981</b>	Device with pneumatic input of 20 - 100 kPa
<b>Electropneumatic positioner type SRI 986</b>	Analog positioner with input signal 4(0) - 20 mA
<b>Electropneumatic positioner (analog) type SRD 990</b>	Device with electric input of 4 (0) - 20 mA and direct pneumatic output into actuator. Adjusted by switches and potentiometers
<b>Electropneumatic positioner (intelligent) type SRD 991</b>	Device with electric input of 4 (0) - 20 mA and outlet of air into actuator. It is adjusted by PC and special software
<b>Electropneumatic positioner (intelligent) type SRD 998</b>	Device with electric input of 4 (0) - 20 mA and direct pneumatic output into actuator. Standard equipment: HART, LED display, adjustment by the multi selector
<b>Electropneumatic positioner SIPART PS2</b>	Digital positioner with input 4(0) - 20 mA
<b>Electropneumatic positioner ABB TZIDC</b>	
<b>Limit switch type SGE985</b>	Adjustable end limit switches
<b>Air set type G651 (-20 to 50°C)</b>	Reduces the supply air pressure to a required value
<b>Air set type FRS 923 (-40 to 80°C)</b>	
<b>Solenoid valve standard type SC G551A005</b>	Direct operated electromagnetic valve, version 3/2, function U (universal), G 1/4"
<b>Solenoid valve standard type SC G327B001</b>	
<b>Solenoid valve EEx em b type EM G327B001, explosion-proof</b>	Direct operated electromagnetic valve, version 3/2, function U (universal) G 1/4", with increased safety, encapsulated epoxy moulded
<b>Solenoid valve EEx d type NF G327B001, explosion-proof</b>	Direct operated electromagnetic valve, version 3/2, function U (universal), G 1/4", flameproof enclosure
<b>Solenoid valve 5/2-way type SCG551B417</b>	Direct operated electromagnetic valve, version 5/2, function U (universal), G 1/4", (use for double-acting actuators)
<b>Air lock relay, type EIL 200</b>	Retaining device for closing of air pipeline on a pressure drop
<b>Booster-valve type EIL 100</b>	Airflow enhancer

<b>A217 WC 6<sup>2)</sup></b>	<b>150</b>	1.98	1.95	1.77	1.58	1.38	1.21	1.02	0.93	0.84	0.74	0.65	0.55	0.46	0.37	0.28	0.14	0.14
<b>A351 CF8M<sup>3)</sup></b>	<b>150</b>	1.90	1.84	1.62	1.48	1.37	1.21	1.02	0.93	0.84	0.74	0.65	0.55	0.46	0.37	0.28	0.14	0.14

<sup>1)</sup> -29°C to 38°C

<sup>2)</sup> Material only normalized annealed.

The intentional addition of any element not listed in ASTM A 217 is not permitted except for Ca and Mg for deoxidation

<sup>3)</sup> Use at temperatures above 540 °C only when the carbon content is 0.04% or higher

## Maximal permissible operating pressures acc. to ASME B16.34-2013 [psig]

Material	Class	Temperature [ °F ]
